

Heraeus Limited Hong Kong achieved accreditation

The Laboratory of Heraeus Ltd. HK has been accredited under ISO/IEC 17025 of the Hong Kong Laboratory Accreditation Scheme (HOKLAS) by Hong Kong Accreditation Service (HKAS).

The Accreditation is recognition of the Laboratory's capability to perform tests for internal as well as external customers under the strict requirements of ISO/IEC17025.

Confirmed by HOKLAS Accreditation Scheme Heraeus Ltd. Hong Kong underlines its ability in delivering the highest quality of analytical service in the most efficient and cost-effective fashion.

Organizations which are accredited under HOKLAS are required to demonstrate strict compliance with management system requirement, technical requirement and quality assurance.

"We are proud to have built a strong team of highly motivated and well-trained staff with a good reputation, professionalism and impartiality," states Jack Lu, President of Heraeus Ltd. Hong Kong.

Best services

The professional analyses and reports from Heraeus support the products of the customers in gaining international reputation. Furthermore Heraeus support the customers and partners with analytical services thus enabling them to run their precious metal businesses with confidence.

Background

HOKLAS is an accreditation scheme operated under the management of the Innovation and Technology Commission, in the Government of the Hong Kong Special Administrative Region (HKSAR) with the aim of recognizing competent testing as well as maintaining and upgrading the standard of testing and management of Hong Kong laboratories.
