Technical Data Sheet

ASSEMBLY MATERIALS

Product Type: Conductive Adhesive
Product Name: PC 3001

Description
PC 3001 is a thermosetting, one-component, solvent-free, silver-filled epoxy conductive adhesive, designed for the connection of electronic (SMDs) and bare dies with LTCC and ceramic substrates.

Key Benefits
- High electrical and thermal conductivity
- Very low degassing
- High reliability

Compliant Products
- SMT Adhesive: PD 955 M

Applications
- Dispensing
- Jetting

Physical Properties

Halogen Content

Hydrolyse Halogen
Tolerance: Halogen < 50 ppm

Cleaning Instructions
The uncured adhesive can be removed with Zestron HC and other Zestron and Vigon cleaning materials. The cleaned parts must be completely dry before installing them in the machine. Defective components can be removed by heating the cured adhesive joint with hot air above 250°C. The hot remaining adhesive can be removed with a sharp tool.

Adhesive Conditioning
- Remove adhesive from freezer: Before opening the package leave it for at least 2 hours at room temperature so that adhesive heats up
- Do not open jar/cartridge while adhesive is cold to prevent condensation
- Do not use faster defrost systems
Technical Data Sheet

Storage

- Store the adhesive in tightly-sealed containers and avoid exposure to high humidity and sunlight
- Store cartridges with tip pointing downwards
- Max. expiration date: Shelf life: Please refer to the expiry date on the label of the packaged product
- Storage condition in the freezer at – 40 °C
