Product Type: Non Conductive Adhesive
Product Name: NCA 5-008

**ASSEMBLY MATERIALS**

**Description**
NCA 5-008 is a fast curing thermosetting, one-component, solvent-free non-conductive adhesive epoxy, designed for the connection of bare dies with lead frames and foils. This adhesive is especially developed for small card applications. The NCA glue has a hardener system, which includes a cationic curing agent.

**Key Benefits**
- High volume production possible
- High reliability
- Snap curing system

**Compliant Products**
- Conductive Adhesive: PC3200 and PC36000 Series
- Non-conductive Adhesive: NCA 6, NCA 11

**Applications**
- Dispensing

**Physical Properties**

**Cleaning Instructions**
The uncured adhesive can be removed with Zestron HC and other Zestron and Vigon cleaning materials. The cleaned parts must be completely dry before installing them in the machine. Defective components can be removed by heating the cured adhesive joint with hot air above 250°C. The hot remaining adhesive can be removed with a sharp tool.

**Adhesive Conditioning**
- Remove adhesive from freezer: Before opening the package leave it for at least 2 hours at room temperature so that adhesive heats up
- Do not open jar/cartridge while adhesive is cold to prevent condensation
- Do not use faster defrost systems
Technical Data Sheet

Storage

- Store the adhesive in tightly-sealed containers and avoid exposure to high humidity and sunlight
- Store the cartridges with tip pointing downwards
- In cartridges: From the date of manufacture 12 months in a freezer at – 20 °C
