IP6075, part of the Celcion material system, is a cadmium free single part dielectric paste which produces a dense, grey, hermetic fired film. IP6075 is compatible with 3000, 4000, 5000 and 6000 grade aluminum substrates. Its unique glass system reduces bowing on aluminum while providing high breakdown strength. It is compatible with C8829B and C8829D Ag conductors.

Description
IP6075, part of the Celcion material system, is a cadmium free single part dielectric paste which produces a dense, grey, hermetic fired film. IP6075 is compatible with 3000, 4000, 5000 and 6000 grade aluminum substrates. Its unique glass system reduces bowing on aluminum while providing high breakdown strength. It is compatible with C8829B and C8829D Ag conductors.

Key Benefits
- REACH1 and ROHS2 compliant
- Excellent electrical properties
- High breakdown voltage
- Compatible with Aluminum substrates

Typical Properties

**Dielectric Constant**
< 20 at 1 KHz

**Dissipation Factor**
< 0.5 % at 1 KHz

**Insulation Resistance**
> 10^9 Ω at 100 DC

**Breakdown Voltage**
> 1000 V DC per mil
(3 individually fired layers)

**Thermal Conductivity**
Tested on ASTM E1461, E1269
On aluminum 3000, 4000, 5000 and 6000 grades
1.0 ~ 2.0 W/m-K

**Bowing Deflection**
3 PDF layers – 2” x 2” Al substrate (full coverage print)
< 0.0210 inch on 2mm 3003 – H14 aluminum alloy
< 0.0085 inch on 2mm 6061 – T6 aluminum alloy

**Viscosity**
40 – 80 Kcps, Brookfield RVT,
SC4-14 spindle with 6R utility cup at 10 rpm, 25 ºC

**Solids**
72.0 ± 2.0 %

Recommended Processing Guidelines

**Printing**
280 mesh stainless steel screen
0.5 mil emulsion thickness
Allow wet prints to level at room temperature for 10 minutes before drying
Three individually fired layers with a total thickness of at least 50 µm will be necessary to achieve the optimum performance level

**Coverage**
155 cm²/g at 40 µm wet film thickness

**Drying**
150 ºC for 15 minutes

**Firing**
550 – 600 ºC to achieve 550 ºC as measured on substrate
Dwell time of 2 – 20 minutes, dependent on application/substrate mass

**Thickness**
Dried: 22 – 27 µm (1 layer)
Fired: 17 – 20 µm (1 layer)
50 – 60 µm (3 layers)

**Thinner**
RV-507

**Warranty**
Material guaranteed to meet specifications for 6 months from date of shipment.

**Storage**
Store in a dry location at 5 – 25 ºC.
DO NOT REFRIGERATE.
Spatulate well before using, as settling may occur during storage.
Technical Data Sheet

Dielectrics for Aluminum Substrates

Legend:

1) REACH compliant according to the latest ** Annex XIV to Regulation (EC) of the European Parliament and of the council on the Registration, Evaluation, Authorisation and Restriction of Chemicals ("REACH") by European Chemicals Agency and its subsequent amendments; the material does not contain any substance listed in Annex XIV.

2) RoHS compliant according to the latest ** Directives (European Union) of Restriction of Hazardous Substances ("RoHS") and its subsequent amendments (including the exceptions related to Pb)

* See the data sheet issue date (DD/MM/YY) as reference of validity of latest edition which is available on request.

The descriptions and engineering data shown here have been compiled by Heraeus using commonly accepted procedures, in conjunction with modern testing equipment, and have been compiled as according to the latest factual knowledge in our possession. The information was up to date on the date this document was printed (latest version can always be supplied upon request). Although the data is considered accurate, we cannot guarantee accuracy, the results, obtained from its use, or any patent infringement resulting from its use (unless this is contractually and explicitly agreed in writing, in advance). The data is supplied on the condition that the user shall conduct tests to determine materials suitability for particular application.
