**Technical Data Sheet**

**Product Type:** Component Metallization  
**Product Name:** DT8832  
**Low Temperature Silver Termination / DPIS**  
*Development Product Information Sheet*

---

**Description**

DT8832 is a low temperature and screen printable pure silver termination. It is designed for larger area printing on NiCr coated PTC discs.

**Key Benefits**

- Excellent printing behaviour for larger area
- Excellent adhesion on NiCr coated PTC discs
- Good fired film density
- Free of nickel, cadmium and phthalate
- REACH\(^1\) and ROHS\(^2\) compliant

**Processing**

1) Spatulate well prior to processing.  
The paste should have acquired room temperature prior to opening, to avoid condensation.

2) Print through a 200 – 325 mesh stainless steel screen.

3) Level at room temperature for 5 – 10 minutes.

4) Dry at 150 °C for 10 – 20 minutes

5) Fire at 460 – 500 °C (peak) for 2 – 10 minutes, and with a total firing cycle time of approx. 30 minutes.

Compensate lower firing temperature with longer dwell time at peak.

**Typical Properties (Paste)**

<table>
<thead>
<tr>

<tr>
<td>Resistivity(^2)</td>
<td>≤ 15 mΩ/□ (FFT: 8 µm)</td>
</tr>
</tbody>
</table>

**Compatibility**

| Substrates                     | NiCr coated PTC discs       |

**Thinner**

HVS 507
The descriptions and engineering data shown here have been compiled by Heraeus using commonly accepted procedures, in conjunction with modern testing equipment, and have been compiled as according to the latest factual knowledge in our possession. The information was up to date on the date this document was printed (latest versions can always be supplied upon request). Although the data is considered accurate, we cannot guarantee accuracy, the results obtained from its use, or any patent infringement resulting from its use (unless this is contractually and explicitly agreed in writing, in advance). The data is supplied on the condition that the user shall conduct tests to determine materials suitability for particular applications.

Low Temperature Silver Termination / DPIS*  
*Development Product Information Sheet

Legend:

1) Typical properties based on laboratory test methods. For optimum results all materials should be fired in a profiled furnace supplied with dried, hydrocarbon and other contaminant free air (PP-1)

2) Measured on alumina 96 % after printing with a 200 mesh stainless steel screen; thickness was c.100 µm, and the resultant printed track was 500 µm wide

3) REACH compliant according to the latest ** Annex XIV to Regulation (EC) of the European Parliament and of the council on the Registration, Evaluation, Authorisation and Restriction of Chemicals (“REACH”) by European Chemicals Agency and its subsequent amendments; the material does not contain any substance listed in Annex XIV.

4) RoHS compliant according to the latest ** Directives (European Union) of Restriction of Hazardous Substances (“RoHS”) and its subsequent amendments (including the exceptions related to Pb)

* See the data sheet issue date (DD/MM/YY) as reference of validity of latest edition which is available on request
