Essentials of Cemented Knee Arthroplasty

ABSTRACTS

 Springer

Table of Contents

I	History	12
1	The History of Total Knee Arthroplasty	12
II	Indications	12
2	Osteoarthritis	12
3	Osteoarthritis and other Indications for Total Knee Arthroplasty – An East African Perspective	13
4	Inflammatory Arthritis	13
5	Osteonecrosis	13
6	Post-Traumatic Arthritis	14
7	Post-Septic Arthritis	14
8	Influence of Lifestyle and Risk Factors on the Development of Knee Arthritis and Outcomes Following Cemented Total Knee Arthroplasty – A US Perspective	15
9	Lifestyle and Risk Factors for Knee Arthroplasty – A South African Perspective	15
10	The Microbiome of the Joint	15
III	Radiographs and Outcomes	16
11	Radiographic Analysis of Knee Arthritis	16
12	Patient-Reported Outcomes in Total Knee Arthroplasty	16
IV	Treatment	17
13	Fixation in Joint Arthroplasty	17
14	Medial Unicompartmental Knee Arthroplasty	17
15	Lateral Unicompartmental Knee Arthroplasty	17
16	Lateral Unicompartmental Knee Arthroplasty – A French Perspective	18
17	Patellofemoral Arthroplasty	18
18	Bicompartmental Knee Arthroplasty	19
19	Total Knee Arthroplasty	19
20	Patellar Resurfacing in Cemented Total Knee Arthroplasty	19
21	Patella Replacement in Knee Arthroplasty – A Japanese Perspective	20
22	Knee Arthroplasty – An Asian Perspective	20
V	Clinical Care Pathways	21
23	Preoperative Optimization in Total Joint Arthroplasty	21
24	Outpatient Total Knee Arthroplasty	21
25	Perioperative Pain Management in Total Knee Arthroplasty	21

VI	Implant Design	22
26	Loosening of Total Knee Arthroplasty – An Australian Perspective	22
27	Cemented, Cruciate-Retaining Total Knee Arthroplasty – The Evolution of a Technique	22
28	Posterior Stabilized Total Knee Arthroplasty	22
29	Bicruciate-Retaining Total Knee Arthroplasty	23
30	Fixed vs. Mobile Bearing Total Knee Arthroplasty	23
31	All-Polyethylene Tibial Components in Primary Total Knee Arthroplasty: Why it Works and Why I Do Not Use It Anymore	24
32	Cementless Total Knee Arthroplasty	24
33	Custom / Patient-Specific Total Knee Arthroplasty	24
34	Alternative Bearings in Total Knee Arthroplasty	25
35	Contemporary Rotating Hinged Prostheses in Primary Total Knee Arthroplasty	25
36	Patellar Component	25
VII	Databases afterwards Database	26
37	International Registries – A Comparison of Outcomes	26
38	USA AJRR – Total Knee Arthroplasty: Lessons Learned	26
39	US National Databases – Total Knee Arthroplasty: Lessons Learned	26
40	Arthroplasty Register Data: Outcomes of Knee Arthroplasty in Younger Patients	27
VIII	Economics	27
41	Economics of Surgical Treatment of Knee Arthritis – a US Perspective	27
42	Conceptualizing the Problem of Cost in Cemented Total Knee Arthroplasty	28
IX	Cementing Technique	28
43	Polymethylmethacrylate Cements for Endoprosthetics	28
44	The Principles of Total Knee Arthroplasty Cementing Technique – A Japanese Perspective	28
45	Influence of Cement Storage Temperature on its Viscosity and Penetration Depth in the Tibia during Total Knee Arthroplasty	29
46	Antibiotic-Loaded Bone Cement: Pro	29
47	Antibiotic-Loaded Bone Cement: Con	30
48	Enhancement of Release Profile of Antibiotic from Antibiotic-Loaded Poly(methyl methacrylate) Bone Cement for Anchoring of Total Joint Arthroplasties: A State-of-the-Art Review	30
49	Tourniquet Use in Cemented Total Knee Arthroplasty	31
X	Complications	31
50	Perioperative Thromboembolic Events	31
51	Current State of the Art for Prophylactic Treatment of Thromboembolic Events after TKA	32
52	Aseptic Loosening – A US Perspective	32
53	Management of Extensor Mechanism Disruption after Total Knee Arthroplasty	32
54	Periprosthetic Fractures	33
55	Infection	33

XI	Management – Revision	34
56	Systematic Evaluation of Painful Total Knee Arthroplasty	34
57	Periprosthetic Joint Infection: Consensus and Guidelines	34
58	Local Delivery of Antibiotics	34
59	Antibiotic-Loaded Bone Cement in Total Knee Arthroplasty	35
60	Antibiotic Spacers for Prosthetic Joint Infections Following Total Knee Arthroplasty	35
61	Does Antibiotic-Loaded Bone Cement Trigger Widespread Antibiotic Resistancies Affecting Prosthetic Joint Infection Treatment?	35
62	Infection Risk-Adjusted Antibiotic Prophylaxis Strategies in Arthroplasty – Low-Dose Single vs. High-Dose Dual Antibiotic-Loaded Bone Cement	36
63	Revision Total Knee Arthroplasty Stems: Cemented vs. Cementless	36
64	Metaphyseal Fixation: Sleeves and Cones	36
XII	Technology	37
65	Custom Cutting Blocks	37
66	Navigation in Total Knee Arthroplasty	37
67	Robot-Assisted Total Knee Arthroplasty	37
68	The Role of Tibal Force Sensors in Total Knee Arthroplasty	38
69	Accelerometers	38

Essentials of Cemented Knee Arthroplasty

The Editors of *Essentials of Cemented Knee Arthroplasty* have compiled a comprehensive textbook on what many consider the most successful surgical procedure of the century. This book rounds out the compendium previously published by Springer on arthroplasty related topics: *The Well Cemented Total Hip Arthroplasty*, *PMMA Cements*, and *Management of Periprosthetic Joint Infection*. Unique to this text is the high quality contributions from over 160 world wide experts in the field, and provides a unique international perspective on the multifaceted topic of knee replacement surgery. Sections include a focus on Surgical Indications, Implant Design, Novel Technologies, Complications, and Cementing Technique, amongst others. Each Chapter not only draws on the most current literature on the subject, but also crystalizes the most important points into clinically relevant, practically applicable “take home messages”. This singular text is notable for not only its breadth, but also its depth, and will be an invaluable resource for knee arthroplasty surgeons throughout the globe.
