Development Engineer (m/f/d)

About YAGEO Nexensos

We are the experts for reliable temperature sensors, even at extreme temperatures and in demanding applications. As the global market leader for platinum thin-film technologies, we offer sensor elements and assemblies with the highest quality standards from -200 °C to +1,000 °C. We enable reliable and sustainable applications and thus make an important contribution to key issues of our time, such as clean air, energy efficiency and resource conservation. We support our customers from rapid prototyping to large-scale production and with constantly adapted production capacities in Europe and Asia.

What you can expect:

- You will be involved in the development of new products in the field of temperature sensors with a focus on sensor assemblies (primary installed sensor elements).
- You will develop and evaluate new product, design and technology ideas.
- Your area of responsibility includes the evaluation of requirements catalogs and specifications as well as the creation of functional specifications including test parameters.
- You ensure smooth project coordination of product development for both customers and internal stakeholders.
- You support the transfer of new products to serial production in an international environment.
- You will also be responsible for sample production, validation, statistical analysis and interpretation of the results.

Your Profile:

- Successfully completed technical studies in engineering sciences
- Experience in dealing with systematic problem-solving and project management methods
- Experience with Six Sigma and statistical test planning and evaluation, as well as experience in the automotive environment (PPAP, APQP, AEC-Q200, IATF 16949) desirable
- Ideally initial knowledge in the field of temperature sensors
- Very good written and spoken German and English skills
- Independent and systematic way of working with strong communication and team skills, as well as a high level of assertiveness
- Willingness to travel nationally and internationally (10 %)
