**The Restriction of Hazardous Substances in Electrical and Electronic Equipment
EU Directive 2011/65/EU amended by delegated Directive (EU) 2015/863 (RoHS II)**

Dear Sir/Madam,

The European Union (EU) Directive 2011/65/EU on the Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment (RoHS II), prohibits placing on the EU market new electrical and electronic equipment (EEE) defined in the categories in Annex I of the Directive, that contain more than the maximum permitted concentration levels of certain hazardous substances in homogenous materials. These substances, with the maximum permitted concentration levels in homogenous materials indicated in brackets, are lead (0.1%), mercury (0.1%), cadmium (0.01%), hexavalent chromium (0.1%), polybrominated biphenyls (PBB) (0.1%), polybrominated diphenyl ethers (PBDE) (0.1%), bis(2-ethylhexyl) phthalate (DEHP) (0.1 %), butyl benzyl phthalate (BBP) (0.1 %), dibutyl phthalate (DBP) (0.1%) and diisobutyl phthalate (DIBP) (0.1 %).

Lamp modules, electronic power supplies and control cabinets are in scope of RoHS II. They fall into category 11, "other EEE not covered by any other category", as listed in Annex I and must comply with the requirements of the Directive since 22 July 2019. We declare RoHS conformity of our lamp modules, electronic power supplies and control cabinets in the EU Declaration of Conformity, as the RoHS Directive stipulates that the CE marking should be affixed to indicate conformity with the RoHS Directive for all products in scope of the Directive.

Yours sincerely

i.A. Katja Schollek
Head of Product Compliance
