### About Excelitas Noblelight

As an expert and world market leader for specialty light sources and systems, we make light in the wavelength range from UV to IR productively usable - for industry, science, environmental protection and health. With sophisticated light sources, Excelitas Noblelight provides its customers with new competitive advantages and continuously opens up new applications!

We are aware of our responsibility towards people and the environment and have set ambitious targets in terms of CO<sub>2</sub> reduction, sustainability, diversity and inclusion, which are at the heart of all our business activities.

Become part of our team and shape the future with us. We look forward to meeting you!

### Your tasks:

- Maintain the Quality Management System and ensures ongoing compliance with the ISO 9001 standard.
- Interface with production daily to ensure proper execution of the company's quality assurance programs.
- Oversee and coordinate the supplier quality program.
- Facilitate communications for key customers and suppliers regarding quality issues and the resolution of any challenges that may impede customer satisfaction.
- Administer the internal quality audit system, a proactive program designed to foresee and prevent problems before they occur.
- Maintain data collection system that provides information related to the quality of our products and systems.
- Work with operations to establish procedures, standards, and systems.
- Perform root-cause investigations in response to external and internal issues.
- Review current standards and policies and creates new ones as necessary.
- Maintain effective work instructions and operating procedures for inspection, operations, and supplier quality assurance per ISO requirements.
- Conduct supplier development activities, including visits/audits, vendor SPC and materials certification programs.
- Train new employees on company policies and procedures, including ethics policies and safety.
- Translate orders, contracts, specifications, and engineering drawings into inspection instructions.
- Evaluate and recommend alternative procedures for auditing to ensure company continuous improvement.
