

Product Information Technical

Liquid rhodium solution

RL RH MR 4511-L H

1 General Information

RL RH MR 4511-L H is a metallo organic material basing on rhodium in solution. The material is typically used as additive for example in the production of metallo organic metal pastes for technical usage.

2 Properties of the product

The major characteristics of a Heraeus precious metal preparation are determined by its production recipe. From each lot produced, we take a sample and check defined characteristics.

Form:	Brown viscos liquid
Viscosity:	not determined
Rhodium content:	5,0% +- 0,2%
Chemical characterization:	Rhodium sulforesinate in a mixture of organic solvents
Calicinated residue:	6,15& Rh ₂ O ₃

3 Storage

Liquid rhodium is subject to an ageing process. Therefore, we recommend using the material within 9 months. The material should be stored at room temperature (20°C). Cool storage – but no freezing – has a positive impact on the shelf life.

4 Processing

Soluble in all common organic solvents. The material can be thinned with cyclohexanone.

5 Remarks

5.1 Determination of the properties

The properties of the product are determined following standardizes laboratory test procedures. For optimal results the material should be fired in a profiled furnace supplied with dried, hydrocarbon and other contimaninant free air.

5.2 REACH (SVHC)

The material is REACH (SVHC) compliant according to the latest ** Annex XIV to Regulation (EC) of the European Parliament and of the council on the Registration, Evaluation, Authorisation and Restriction of Chemicals (“REACH”) by European Chemicals Agency and its subsequent amendments; the material does not contain any substance listed in Annex XIV.

5.3 RoHS

The material is RoHS compliant according to the latest ** Directives (European Union) of Restriction of Hazardous Substances (“RoHS”) and its subsequent amendments (including the exceptions related to Pb)
